

Serrano Water District Enterprise System Catalog

Senate Bill 272 – California Public Records Act

Approved by California Governor Jerry Brown on October 11, 2015, Senate Bill 272 adds a section to the California Public Records Act requiring state and local government agencies to create a catalog of Enterprise Systems by July 1, 2016, with annual updates.

Enterprise System

An Enterprise System, as defined by Senate Bill 272, is a software application or computer system that collects, stores, exchanges, and analyzes information an agency uses that is both of the following:

- A multi-departmental system or a system that contains information collected about the public
- A system that serves as a 'system of record' or an original source of data within an agency
- Enterprise systems do not include cybersecurity systems, infrastructure and mechanical control systems, or information that would reveal vulnerabilities to, or otherwise increase the potential for an attack on, a public agency's IT systems.

The Serrano Water District Enterprise System Catalog is listed on the following pages.
